47. Zahra has caught a terrible flu because she had to ...... home in ...... (•/Ya)

#### پاسخ: walk, rain

خ: stay, rest

پاسخ: gym

یاسخ:

48. Zahra and Mobina can't go to the ..... because Zahra is sick. (•/Ya)

49. Mobina told Zahra to stay at ..... and take a ..... (•/Y۵)

50. What is more important according to Mobina?  $(\circ/V\Delta)$ 

#### Health is more important.

دانشآموزان عزیز، در این بخش به یک متن در مورد «فرهنگ لغت» گوش دهید. سپس جاهای خالی را با کلمات مناسب کامل کنید. (۲/۵)

A dictionary is one of the most important tools that helps you get  $...(\Delta 1)$ ... about words and use them correctly. You should know how to use a dictionary effectively. The words in a dictionary have been arranged in alphabetical  $...(\Delta 7)$ ..., so it will be easy to access them. Some words have more than one meaning, but how do we decide which  $...(\Delta 7)$ ... to use? First, decide how the word is used. Second, read all meanings of the word given to you. Third,  $...(\Delta 7)$ ... a blank space in the sentence where the word appears and finally, replace the correct word into that sentence. If the sentence is still alright, you have the correct  $...(\Delta \Delta)$ .... The more you practice, the more you get skillful.

Many countries now think that cars that burn fossil fuels should be replaced by electric cars. Electric cars don't burn gasoline in the engine, so they don't pollute the air. They use electricity stored on the car in batteries. Sometimes, 17 or 15 batteries, or more, are needed to power the car. Just like a remote-controlled car, an electric

car has an electric motor that turns the wheels and a battery to run the motor.

Electricity, the same energy that lights your lamps and runs your TV, is stored in batteries on an electric car. The batteries can be like the batteries you find in flashlights or in regular gasoline cars. To get the battery ready to roll, you have to charge it. This process isn't much different from the way you charge the portable devices you carry around every day. Your cell phone, MP^m player, or digital camera. The difference is that you deal with a much bigger gadget that carries you around instead.

True/False

379. According to the pass	sage, many countries think	that cars that use fossil fu	els should be replaced	l by electi	ric cars.
			a) True	b) False	e (•/۵)
					پاسخ: True

It is very important for students to know how to use a dictionary because a dictionary gives the users a lot of information. Here you can find some helpful tips to use a dictionary well.

Choose the Right Dictionary. There are many different types of dictionaries such as learner's dictionaries, general dictionaries and etc. Therefore, first identify your needs. Without choosing the right one you cannot meet your language needs.

Read the Definitions. Once you find an entry, you can find the exact meaning of the word, its pronunciation, part of speech, synonyms, antonyms, and probably its origin.

Learn the Abbreviations. Different types of abbreviations are often used in the definitions for a word. This can be confusing if you do not know what the abbreviations stand for.

True/False

**384**.According to the passage, there is only one type of good dictionary.

a) True b) False (•/۵)

پاسخ: False

## **جهت دریافت خدمات رایگان <mark>عدد ۲</mark> را به <mark>۲۰۰۷ ۱۰۰۰۰ پیامک کنید</mark>**

- Respect is not only for people, you also need to respect nature. You should learn to respect nature and also teach it to your next generation. There are some good ways to improve the sense of respect for nature among society.
- When you are outside with your children, take the time to show them the beauty of nature. Show them the blueness of the sky on a clear, bright day, or grey sky on a cloudy day. Ask your child to touch trees, rocks and leaves to feel the temperatures. You can also teach your kids the names of different plants, trees, and animals and practice identifying them. You can do these and show the beauty of nature in your yard or in your favorite park. You may buy a plant for each child that they can take care of inside or outside of the house. You should remind your children that all living creatures are parts of our world and are valuable in the nature environment.

Irue/Faise		
388.According to the passage, people should only respect other people.	a) True	b) False (•/۵)
		پاسخ: False
389.Our next generations need to know about nature and its value.	a) True	b) False (•/۵)
		پاسخ: True
Answer the following questions.		
<b>390.</b> Where can you show your children the beauty of nature? (1)		
		پاسخ:
You can do this in your yard or in your favorite park.		
<b>391.</b> What should you remind to kids? (1)		

You should remind your children that all living creatures are part of our world and are valuable in the natural environment.

Respect is a way of acting well or thinking highly about something or someone. You respect those who are important to you. You show your respect by being polite and kind. When you are impolite or act badly toward people, they may feel sad or angry. But whom should you respect the most?

You must care for those who always care for you. You know that your parents care for you for every little thing. You must love them, respect them, and care for them. Besides bringing you into the world, your parents spend their time, energy, and strength to make sure that you have what you need or want. Telling them that you thank them reflects the level of your respect for them.

The easiest way to show your love and respect is to tell them that you appreciate who they are and what they do. You can also do something small but meaningful, for example, wash the dishes, clean the kitchen after dinner or clean the rooms. Your parents will pay attention to and appreciate your acts of kindness. You may also tell your mom how well she cooks, or tell your dad how great he is at his job. For most of parents, any of these small things can be a sign of respect.

True/False

<b>392.</b> We respect those who are important to us for some reasons.			a) True	b) False	(•/۵)
					پاسخ: True
393.If you are impolite	e or act badly toward people	, they feel important.	a) True	b) False	(•/۵)

پاسخ:

When early humans hunted and collected food, they could not control their environment. They could live in their environment like other animals. When humans learned to make fire, however, <u>they</u> became skillful at changing their environment. To provide themselves with fuel, they cut trees and made fires. Parts of forests were changed to lands to increase the growth of grass and to provide a greater area for the animals that humans ate as their food. This improvement ended in farming and also keeping animals as sources of human food. Fire also provided the means for cooking plants which were not used before. After meeting the simple need for food, early humans began to follow other goals such as founding the cities and living in larger groups. True/False

Suppose that you have a very small vocabulary. Also suppose that you don't know how to get the meanings of new words. When you come across an unfamiliar word, that word may stop your understanding of the passage. Your eyes pause too long on the word as you try to get its meaning. You go back and read the word again, try to get its meaning from the context. As a result, you read much more slowly than you should, and you find that the difficult word is a wall to your comprehension. Suppose that you know many words and you are skilled in finding the meanings of new words. Your eyes move quickly and you read rapidly. You comprehend what you are reading. If you have a good vocabulary, you are more interested in reading.

404. What may happen when you come across an unfamiliar word? (1)

				پاسخ:

What do people need to light their homes and drive cars? Energy!

Energy gives power to many things we need and use. Most of the energy people use comes from coal, oil, and gas. They are called fossil fuels. Those fuels come from fossils under the ground.

Fossils are the remains of plants and animals that lived long ago. Burning fossil fuels pollutes the air. The air becomes dirty. That can be harmful to people, animals, and plants.

Now more people are using clean energy. Such energy does not pullute the air. Two kinds of clean energy are wind power and solar power.

Solar power: The sun gives Earth heat and light. Some homes have solar panels on the roof. The panels collect sun light and turn it into electricity. That is a kind of energy. It lets people do many things. For example, we use electricity to light our homes and watch television. Solar power can also be used to warm up the water in our homes.

Wind power: People can turn wind energy into electricity. Wind turbines are machines that spin when the wind blows. They make electricity.

409. Where does most of the energy that people use come from? (1)

a) the wind

b) plants

c) fossil fuels

d) the sun

پاسخ: (C)

### **جهت دریافت خدمات رایگان <mark>عدد ۲</mark> را به ۲۰۰۰ ۱۰۰۰۰ پیامک کنید**

Reading				پاسخ: (a)

Energy is the ability to do work. It can take a variety of forms: mechanical, electrical, chemical, and nuclear. To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil, and coal.

We get most of our energy from these fossil fuels, but this is harmful to the environment. Fossil fuels are nonrenewable and cannot be replaced easily. Once we use them up, they're gone forever. They are not clean as they pollute water or air.

In recent years, scientists try to use other types of energy resources. They call them clean energy resources because they do not pollute the earth. Clean energy is renewable. It is made from resources that can be replaced, like wind, water, sunshine, tides, and plants.

The most common type of clean energy is the solar power. Solar energy is produced by the radiation that reaches the earth. People have used the sun as a heat source for thousands of years. Iranians, for instance, use special designs and arrangements of windows, balconies and yards to get the most sunshine. Different types of materials might also be used in building the houses. This keeps people warm during cold seasons and cool during hot days of the year..

It is very important for us to respect our teachers. We should note that teachers were not always teachers. They were once students like us. They have experienced school time like us. We know that teachers want to help students learn. They have a lot to share with us: their life experiences, their failures, their successes and many more.

When we respect others, we are actually respecting ourselves. We can show our respect to our teachers by paying attention during lessons and following classroom rules. Remember that a good student is always prepared for class.

We all have met many dedicated teachers that go far beyond their duties and become a model for the students. When we listen to them and respect them, they feel honored. When we study well, we are actually appreciating them for their love and attempt.

True/False

- Many Scientists believe some kinds of technology are harmful to your health. For example, they say that mobile phones should be used as little as possible. They think it is better to be careful about using mobile phones. A lot of scientists believe they are harmful and bad specially for children.
- In fact, researchers show that mobile phones could kill more people than smoking. They can cause headaches, tiredness, and memory loss in some people. We have so much technology now; there are 24-hour televisions, computers, online games, phones and so on. Technology can be dangerous if you spend a lot of your time for using it.
- You should not keep electrical devices in your bedroom when you are sleeping because they can cause sleep problems. It is important to have no electric items in your bed. If you cannot do without them, make sure you do not have a computer or mobile in your bedroom or at least make sure that they are turned off. You should use your mobile phone for limited amount of time each day because they can cause brain problems if they are used for a long time over the years.
- Always remember that your health is very important as you might find you are unable to return good health once you have lost it.

For English teachers, a dictionary is essential for any teaching program and needs to be used carefully. A dictionary is the basic thing for any language class. The most important thing that a student should know is how to use it. A student needs to have at least three dictionaries available to learn English properly. The first one should be a bilingual dictionary that covers words in the native language as well as in English. The second one should be a monolingual dictionary that gives word information in English. The third one should be a native language dictionary.

When teaching begins, learners will use a bilingual dictionary for simple translations. Monoligual dictionaries are also necessary pieces of language learning studies, because they provide learners with definitions, pronunciations, etc. The problem becomes hard with studies when the students do not fully understand the words <u>they</u> are translating, and they get confused. Teachers know that they should clear up the confusion quickly before they jump into to the next lesson. When the students enter a more advanced level, they must have a native language dictionary that relates to their own language. When they do not understand the meaning of a translated word in their own native language, they can use this dictionary to figure it out.

True/False

426.A dictionary is the	basic thing for any languag	e class.	a) True	b) False	(•/۵)
					پاسخ: True
427.Students must have	e more than four dictionari	es to learn English.	a) True	b) False	(•/۵)

Pablo Picasso was a distinguished artist. He was born in Spain on October 25, 1881. His father was a painter and art teacher. <u>He</u> helped his son to improve his artistic ability. When Picasso was 10 years old, his family move to Barcelona, Spain where Picasso took an exam to attend a popular Art School. The exam was going to take one month, however it was very surprising that Picasso finished it in one day.

A few years later, he went to another school in Madrid. He was bored with the old Teachings of Art School, and he did not want to paint like people hundreds of years ago. He really wanted to create something new. He moved to Paris where he worked as an artist and created his wonderful drawings. During this time, he created his famous Blue period works. In 1907, Picasso painted a painting that is known as the first painting in the modern art movement. Artists from all over the world travelled there to see this painting.

In 1907, Picasso began to experiment with a new style of painting. He is well-known for creating the Cubism Style. One of the most interesting things about Picasso is that he was the first artist to be famous during his own lifetime. He was one of the most important artists of the 20th century. He died on April 8, 1973. True/False

Many countries now think that cars that burn fossil fuels should be replaced by electric cars. Electric cars don't burn gasoline in the engine, so they don't make the air dirty and unclean. They use electricity stored on the car in batteries.

The electric car is usually plugged in at night. The car can be plugged into a special charging unit even at houses. Some electric cars can be plugged right into a regular electrical wall outlet. Others need a larger outlet, like the kind that a stove or a vacuum cleaner plugs into.

The engineers are trying to make better batteries that hold more energy and last longer. To overcome the problem of charging electric cars, hybrid cars are also available. Hybrid cars combine the benefits of gasoline engines and electric motors. They can be designed to meet different goals, such as better fuel economy or more power.

438.Why don't electric cars make the air dirty and unclean? (1)			
			پاسخ:
They don't make the air dirty and unclean because they don't burn gasoling	e in the engine		
439.When is usually the electric car plugged in? (1)			
			پاسخ:
The electric car is usually plugged in at night.			
440.Why do people hybrid cars? (1)			
			پاسخ:
People use hybrid cars because Hybrid cars combine the benefits of gasolir	ne engines and	electric motors.	
441.Electric cars use both fossil fuel and electricity.	a) True	b) False (∘/۵)	
		Fals	پاسخ: e
442.Not all electric cars have batteries.	a) True	b) False (∘/۵)	
		Fals	پاسخ: e

The size and shape of your ears show your character more than any other part of the face. Other parts of the face change shapes as we get older, but ears do not change their shapes. They only change in size.

Reading people's character from their ears is a very old science. In the past people thought that a person's ears with color were dangerous. They also thought that the shape of the ears showed if a person was musical or not. Today, too many people believe that the size and shape of the ears help you know if a person is musical. Ears are all different, and each different thing has a meaning.

Next time you look at a person, see if his or her ears are large, medium-size, or small. Look at the lobes (نرمه Ears that are always red mean that a person may get angry easily. Ears that are always cold and nearly white color mean that a person has a nervous character.

443.When we grow up, .....? (1)

- a) our ears will not change in size
- c) our ears will get colder

b) our ears will be the same sized) our ears will not change in shape

پاسخ: (d)

- It is very important for us to respect our elders. It is also important to note that elders were not born elders; they were kids like us and now have grown old. A few years hence we will also grow older. If today we respect them, our present and future generations will carry those values and will learn to respect us as well when we grow old.
- Elders have a lot to share with us: their life experiences, their failures, their successes and many more. Thus, we need to care for them because they deserve to be cared for. Respect and care for elders start with our parents, as <u>they</u> are our first teachers in our life.
- No matter what we do in our lives, who we are, and where we live, we must love them as they love us unconditionally. They feel honored when we appreciate their love and respect them.
- True/False

447.It is important to remen	iber that elders were	not born elders.	a) True	b) False	(•/Δ)
					پاسخ: True
448. The passage says that el	ders have nothing to	share with us.	a) True	b) False	(•/۵)

A good dictionary gives the user information about words such as spellings, pronunciations and definitions. It also gives examples of how to use the words in sentences correctly. Therefore, it is essential to know how to use a dictionary. In this text, we provide you with some helpful tips on how to use a dictionary effectively.

1. Read the Guide Words. These are the two words at the top of each page that show the first and last entries on the page. These words will help you find the word you are looking for in the right letter section.

2. Read the Definitions. Once you find an entry, you can find the exact meaning of the word, its pronunciation, part of speech, synonyms, antonyms, and probably its origin.

3. Look for Collocations. Learning the meaning of a single word is not usually enough. Through sentence examples, try to learn collocations to expand your vocabulary.

Hydropower is a type of renewable energy. It uses water to make electricity. Water moves in a large cycle and then goes back to the ocean. The energy of this water cycle produces electricity. Because the water cycle is an endless system, hydropower is a renewable energy. When falling or running water is turned into electricity, it is called hydroelectric power or hydropower. Turbines convert the water energy into electricity which is then used for houses and businesses. This clean renewable energy is used in some countries to keep their cities and villages clean. In this way, fewer fossil fuels are consumed each year, and they are saved for future. True/False

- Albert Einstein, a physicist, was born on March 14, 1479, in Germany. He could change people's understanding of the physical world, therefore, he has been considered as one of the greatest thinkers in science. After graduating in 1900, Einstein had a hard time finding a job. He finally got a job at the Swiss Patent Office in 1907. This job gave him the time to do some of his important works like writing theoretic papers on physics, especially his Theory of Relativity.
- He became a professor at the German University in Prague. He began working at the Prussian Academy of Sciences in Berlin in 1917, and soon finished his work on his General Theory of Relativity, which was published in 1918. Einstein was awarded the Nobel Prize for physics in 1971. In 1977, he left Germany because of the strict rules of Hitler. He went to work at the Institute of Advanced Study at Princeton University in New Jersey. He later became a U.S citizen. During World War II, he wrote a letter to President Roosevelt expressing his worry about the atomic bomb.
- After stopping his work in the institute in 1996, he spent much of his time giving lectures and speeches and working on theories. In his final years, he lost his health. He was hospitalized with stomach pains several times, and he died on April 14, 1966.

#### متن زیر را بخوانید و به سوالات داده شده هر قسمت پاسخ دهید. (۴)

All of our energy comes from the sun which is our nearest star. The sun sends out huge amounts of energy through its rays every day. We call this energy solar energy or radiant energy. Life on earth would not exist without the sun because our planet would become totally frozen. We use this solar energy in many different ways. The sunlight lets us see and warms us. Plants use light from the sun to grow and they store it as chemical energy. This process is called Photosynthesis. The energy is stored in their roots, fruits, and leaves. This energy feeds every living thing on the earth. When we eat plants and the food made from plants, the energy is stored in our bodies especially in our muscles and brain cells. We use this energy for everything we do. We use energy when we sing a song, think a thought, tell a joke or climb mountains. Everything needs energy.

Just as humans store energy in their bodies, the earth stores the sun's energy too. The sun's energy has also been stored in coal, oil, and natural gases which are known as fossil fuels. We may use the energy in these fossil fuels to make electricity. We light and heat our homes, schools, and offices and also run our computers by electricity. Our cars and planes run on gasoline which comes from oil. Fossil fuels are known as non-renewable sources of energy, so they can't be used over and over again. This means that one day they will run out!

Luckily, there are some renewable energy sources we can use, and we can keep using. Unlike non-renewable fossil fuels, <u>they</u> will not run out. Three forms of renewable energy are: solar energy, water energy and wind energy. Solar energy can be caught through solar panels. People put solar panels on the top of houses to help capture the sun's energy and transform it into heat and electricity. Water is also used to produce electricity. Wind is a third form of renewable energy. Wind turbines can get the energy of the moving air and turn it into electricity. All these renewable energy sources are essential for us because they will not run out, so we need to get better and better at using them..

Choose the best answer.

466.What does "they" in paragraph 3, line 2 refer	to? (•/Δ)		
a) fossil fuels	b) non-renewable energy	sources	
c) renewable sources of energy	d) solar panels

Some people prefer to provide help and support directly to those in need. However, others prefer to give money to national and international charity organizations. Giving money to those in need can be a personally good experience, but there is a choice between donating nationally and internationally through charities or giving directly to those around you.

One of the advantages of providing direct support is that you can know exactly how your money is spent. Another <u>benefit</u> is that you can see the impacts on those you are helping, which can lead not only to great personal happiness but also to respect from others who appreciate the work you do.

There are advantages in giving to charities that are national and international. First and the best is helping in problems of global importance, such as curing diseases and human rights or helping those who are in bad environmental events like earthquakes and floods.

In conclusion a person should make their own choice in helping others. The important point is that we continue to give to those who are more in need than ourselves.

472. What can it lead to when you see the impacts on those you are helping? (1)

It can lead not only to great personal	happiness but also to respect fron	n others who appreciate the work you do.

**473.**What is the important point in helping others? (1)

The important point is that we continue to give to those who are more in need than ourselves.

A dictionary is a collection of words ranging from letters A-Z. When reading or writing a story, an essay, a paragraph or even a sentence, using a dictionary is a great help.

There are many advantages of using a dictionary. So, using a dictionary is important for students. The first advantage of using a dictionary is pronunciation. We can also listen to the pronunciation of the words if we use an audio dictionary. The second advantage of using a dictionary is checking out a word's right spelling. The third advantage of using it is learning a word's part of speech. <u>It</u> is one of the types into which words are divided in grammar according to their use, such as noun, verb, or adjective.

Lastly, example sentences are mostly <u>available</u>. Seeing specific words used in a sentence can provide more context and help you better understand proper usage. However, searching words by using a dictionary takes a lot of time. By using a talking dictionary, we are able to look the words up in a few minutes.

As a result, a dictionary is a great help for everyone, especially students who are learning a language and who are interested in language learning..

A dictionary is a book that explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word "dictionary" comes from the Latin "diction" ("saying").

- These are several kinds of dictionaries. Dictionaries that explain words and how they are used; dictionaries that translate words from one language to another, dictionaries of biography that tell about famous people; and technical dictionaries that explain the meanings of technical words.
- Dictionaries that explain what words mean give a clear "definition" of <u>them</u>. A good dictionary also gives more information about words. For instance, it explains how they are pronounced.
- Usually the International Phonetic Alphabet (IPA) is used for this purpose. A complete dictionary also tells you about the origin of words and the story behind them. For example, the words like "pajamas", "bazaar" and "paradise" entered English from Persian..

The most common type of clean energy is the solar power. Solar energy is produced by the radiation that reaches the earth. People have used the sun as a heat source for thousands of years. Iranians, for instance, use special designs and arrangements of windows, balconies and yards to get the most sunshine. Different kinds of materials might also be used in building the houses. This keeps people warm during cold seasons and cool during hot days of the year.

Nowadays, solar energy can be converted into other forms of energy, such as heat and electricity. Solar energy might be used for heating water and air in homes, buildings, or swimming pools. Maybe you've seen buildings or houses with big shiny panels on the roof. These solar collectors collect heat by absorbing sunlight. Solar energy is used in generating electricity for watches, highway signs, houses and even space stations.

True/False

521.According to the passage, solar power is the most common type of clean energy.		a) True	b) False (•/۵)

For many people, their teenage years – from 13 to 19 – are sometimes the best or worst years of their lives. Sometimes some teenagers feel that there are many differences between them and their parents. Teenagers often want to show that what they do is correct. They want to wear different clothes to show that they are free. In some countries, they can drive when they are only 16. Many young people work at part-time jobs after school and on weekends, so they can buy their own cars. After finishing high school, some of them live in their own apartments. Still teenagers must know that their parents have a lot to share with them: their life experiences, their failures, their successes. They should respect and care for their parents as parents are the best support in their lives.

True/False

526.According to the passage, teenagers are between thirteen and nineteen years old.	a) True	b) False (•/۵)
		پاسخ: True
527. Teenagers at the age 16 can drive in all countries.	a) True	b) False (•/۵)

#### متن زیر را بخوانید و به سوالات هر قسمت پاسخ دهید. (۴)

- There are many languages in the world, some of which may seem harder to learn for second or foreign learners. But which is the most difficult language to learn? Well, it's not easy to reply because there are many factors to discuss.
- A native speaker of French, for example, will find English easier to learn than Chinese, because English is very similar to French, while Chinese is very different. As a result, first Language can affect learning a second language. The greater the differences between the second language and the first, the harder <u>it</u> will be to learn. Many people answer that Chinese is the hardest language to learn, possibly influenced by the thought of learning the Chinese writing system. Besides, the pronunciation of Chinese does appear to be very difficult for many foreign learners. However, for Japanese speakers, who already use Chinese letters in their own language, learning writing will be less difficult than for speakers of languages using the Roman alphabet.
- Teachers and the conditions in which the language is learned also play an important role, as well as each lerner's motivation for learning. If people learn a language because they need to use it for a living, they often learn it faster than people who study a language that has no direct use in their day to day life..

#### Choose the best answer.

569. The word "it" in paragraph 2 line 4 refers to	. (•/۵)			
a) learning first language	b) second language			
c) difference of languages	d) Chinese language			
				باسخ: (b)
570.Hard ness of learning a language can depend on	(•/۵)			
a) how different it is from one's mother tongue	b) whether it is French or En	glish		
c) whether you are learning Japanese or Chinese	d) how long it takes to maste	r pronunci	iation	
				باسخ: (a)
True/False				
571.Being familiar with writing system of the second lang	guage makes it harder to learn.	a) True	b) False	(•/۵)
				باسخ: False
572. The reason behind learning a language can slow down	n or speed up learning.	a) True	b) False	
				باسخ: True
Answer the following questions.				C .
573.Which language is easier for French people to learn,	English or Chinese? Why? (\)			
				اسخ:
English is easier for French people to learn because i	t is very similar to French.			C
574.Why does a Japanese speaker find the Chinese writin	ng system less difficult? (1)			
				اسخ:
Because they already use Chinese letters in their own	n language.

The research for new sources of energy has led into various ways. To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil and coal. Electricity is generated from coal, oil and natural gas, but the process has been proven to be expensive.

Experimental works are in progress to produce energy from other resources. Scientists and experts spared no

### **جهت دریافت خدمات رایگان <mark>عدد ۲</mark> را به ۲۰۰۰٬۲۰۰۰ پیامک کنید**

pains to search for new ways of producing new source of energy. For instance, electricity has been produced with giant wind turbines. Geothermal power or the heat from the earth is also being tested to produce energy. Many societies are burning rubbish and other biological waste products to generate electricity. Not only changing unwanted products to gas or oil is a cheap way to produce energy, but also it is an effective way to get rid of waste.

Some experts expect service companies to expand hydroelectric power generated from streams and rivers. As an example, 50 years ago hydroelectric power provided one-third of the electricity used in the United States but today it includes only 4%. The oceans are another possible source of energy. Scientists are studying ways to change the energy of oceans' tides and waves into electricity. Experiments are also underway to make use of temperature differences in ocean water to produce energy.

Clean energy resources are vastly respected, valued, and used all over the word to keep the environment clean. As a result, scientists try to introduce new types of energy resources called clean energy resources to nations of the world.

Read the questions and choose the best choice.

575.Which is the best title f	for this passage? (•/۵)				
<ul><li>a) The use of waste products for energy</li><li>c) Effective ways of producing hydropower</li></ul>		<ul><li>b) The search for new sources of energy</li><li>d) New discoveries in geothermal power</li></ul>
